

Chemistry 20	Unit 2
Lesson 10 - Review	84 mins

Gas Laws

<p>Boyle's Law</p> <ul style="list-style-type: none"> - Constant Temperature 	$P_1V_1 = P_2V_2$ $\uparrow P = \downarrow V$ $\uparrow V = \downarrow P$
<p>Charles' Law</p> <ul style="list-style-type: none"> - Constant Pressure 	$\frac{V_1}{T_1} = \frac{V_2}{T_2}$ $\uparrow T = \uparrow V$ $\downarrow T = \downarrow V$
<p>Guy Lussac's Law</p> <ul style="list-style-type: none"> - Constant Volume 	$\frac{P_1}{T_1} = \frac{P_2}{T_2}$ $\uparrow T = \uparrow P$ $\downarrow T = \downarrow P$
<p>Combined Gas Law</p>	$\frac{P_1V_1}{T_1} = \frac{P_2V_2}{T_2}$
<p>Ideal Gas Law</p>	$PV = nRT$

Ideal Gases

<p>Ideal Gases</p> <ul style="list-style-type: none"> - Each molecule takes up no space, volume of each molecule can be described as 0. - Don't change state. Are gases from 0K to 1000K and up... - NO intermolecular forces 	<p>Real Gases</p> <ul style="list-style-type: none"> - Each molecule takes up space, each molecule has a defined volume, albeit small. - Molecules have intermolecular forces (LDFs mostly)
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Real gases will act like ideal gases at high temperatures and low pressures.

Law of Combined Volumes

$N_2 + (3)H_2 \rightarrow (2)NH_3$ <ul style="list-style-type: none"> - Similar to unit conversation 	<p>1 : 3 : 2</p> <p>If you have 12 L of H_2 what is the volume of NH_3 produced if N_2 is in excess, (ie WAY more than there is H_2)</p> $12 \text{ L of } H_2 \times \frac{2 \text{ of } NH_3}{3 \text{ of } N_2} = 8.0 \text{ L of } NH_3$
---------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------
